USENIX '08

2008 USENIX Annual Technical Conference

BOSTON

June 22–27, 2008

Join us in Boston for the latest in ground-breaking systems research and cutting-edge practices in a wide variety of technologies.

This year's top-notch program includes:

3 Days of Training: June 22-24, 2008

Learn from industry experts such as:

» Bruce Potter on Botnets: Understanding and Defense

» Peter Baer Galvin on Solaris 10 Administration

» Phil Cox and Brad Johnson on Securing Virtual Environments

» and over 20 other full- and half-day tutorials

3-Day Technical Program: June 25-27, 2008

» The latest systems research, presented in the Refereed Paper Track

» Keynote Address by David Patterson, Director, U.C. Berkeley Parallel Computing Laboratory, on "The Parallel Revolution Has Started: Are You Part of the Solution or Part of the Problem?"

» Plenary Closing Session by Matthew Melis of the NASA Glenn Research Center on "The Columbia Accident Investigation and Returning NASA's Space Shuttle to Flight"

» Plus invited talks, guru sessions, poster and vendor sessions, BoFs, and more!
